FALL 2003

PHYS 606 How Things Work II - 3 graduate credits

View Lecture/Demonstrations on CDs (Real Media format) at home and learn how to show your students the relevance of science in their lives with topics like: electric charge and static cling, magnetism and levitating trains, generating electricity, electronics, audio amplifiers, cameras, computers and much more.

- ☞ Course help through email and chat room.
- ☞ “How Things Work I” is NOT a prerequisite to this course! No previous physics background assumed.
- ☞ Homework & Exams via WebAssign (a web-based homework delivery system).

Course runs from Sept 22 - Dec 19, 2003.
