Click "Add manually"
(This might not appear
for a few seconds.)

6

Add Printer

Find a printer by other options

○ My printer is a little older. Help me find it.

○ Select a shared printer by name

[   ] Browse...

Example: \\computername\printername or
http://computername/printers/printername/.printer

Choose this ➡ ● Add a printer using an IP address or hostname

○ Add a Bluetooth, wireless or network discoverable printer

○ Add a local printer or network printer with manual settings

Next   Cancel

7

Add Printer

Type a printer hostname or IP address

Choose "TCP/IP Device" ➡

| Device type:	TCP/IP Device ∨

Enter this address ➡

| Hostname or IP address:	copier-100.phys.virginia.edu
Port name:	copier-100.phys.virginia.edu_1

☑ Query the printer and automatically select the driver to use

Autodetect detects WSD and TCP/IP printers.
To search for an IPP printer, IPP must be selected from the drop down menu.

Next   Cancel

8

Add Printer

Install the printer driver

Choose your printer from the list. Click Windows Update to see more models.

To install the driver from an installation CD, click Have Disk.

Manufacturer	Printers
Canon	
Generic	
Microsoft	

This driver is digitally signed.
Tell me why driver signing is important

Windows Update   Have Disk...

Next   Cancel

Click "Have Disk"

9

Browse through the files you downloaded and extracted earlier. Find the .INF file inside the "x64" folder.

10

Name the printer "copier-100" and accept the defaults for any further settings.

At this point, the printer should be ready to use.

When you print, you'll see this dialog box.

Enter your "copy code" in the "Department ID" box.

Leave the "PIN" box empty.
